HANSAPOLO:  
A GOOD  
DECISION.

HANSAPOLO

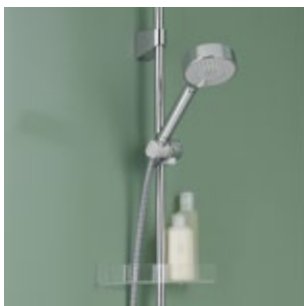

# ENSURING THAT YOU GET EVERYTHING THE NEW HANSAPOLO FOR THE BATH

Options for your personal washbasin solution: the elegant model with side operation (above) or the XL version (right), which is 20mm taller and has a larger spout than the classic lever mixer.

The HANSABASICJET shower range is the perfect accompaniment for the bathtub and the shower.

Nowadays, fittings for the bathroom and kitchen must be able to do more than just provide water – irrespective of the budget. Considerable demands are placed on quality, function and design. The new HANSAPOLO meets these demands with aplomb. The first thing that you notice is the contemporary dynamic design. With its clear geometrical shape, it is universally suited to all architectural and interior design styles.

Interesting new versions for the washbasin – a tall XL version and a side-operated model – offer greater individual creative freedom.

HANSAPOLO consumes just 6 liters of water per minute and thus makes a daily contribution to saving water. With all the best you may expect from the HANSA premium quality brand - and with a remarkable price/performance ratio.

G RIGHT:  
ROOM.

HANSAPOLO  
FOR THE  
KITCHEN.

HANSAPOLO as a classic lever mixer – with a fresh and functional design (see image below). The version with side operation is new (see image on the left).

HANSAPOLO ensures that you get everything right in the kitchen, too.

Look no further – our models guarantee a uniform fitting design landscape. Choose between a classic lever mixer with a long swivel spout, a side-operated model and an elegant tall version.

The optional shut-off valve offers additional comfort and safety.

	Restriction of the flow rate to 6 l/min (indicated by product) and intelligent stream formation ensure optimised water consumption with full comfort.
	Very quiet. Fitting complies with the strict conditions under noise protection class 1.
	Various heights and projections for individual preferred comfort.
	THERMO COOL. Improved safety – the housing of the fitting conducts minimal heat.
At least one product of this range has the indicated characteristics.
